

Guardex

Guardex Full High GRD-FH990

Specification

Single Lane Dimension: 1700*1460*2300 mm

Double lane Dimension: 2400*1460*2300 mm

Rod material: 304 stainless steel

Thickness : 1.5 mm

Lane width: ≤550 mm

speed: 35 person/min adjustable

Power supply voltage: AC 85 - 230 V

Working voltage: DC 24 V

Working temperature: -20°C to 60°C

Functions

Adopt High-level full-automatic intelligent mechanism ,Brushless DC motor, System operation stable with low noise,

Anti-pinch and anti-collision function, Automatical control system , Power board, Passage LED indicator , Passage Mode setting

Anti-shock function, the swing arm is automatically locked when no open signal is received;

The power-off the flap is automatically opened and automatically closed when it is powered, which meets the fire protection requirements.

with time protection and automatical reset function

Unified electrical interface , Can be connected with reading and writing equipments.

Our Advantages

Experience factory , all size , thickness and appearance can be customized . OEM & ODM requirements are accepted

Can be connected with Access control systems , Security Checking system . And be able to provide system integration solutions.

Strict production process and quality control, assure of our products quality .

Professional sales team and after services team , can offer local services, looking for long term cooperation with you .
